

Supplemental Material

Table S1. The use of conventional POTS therapy in the POTS group.

	POTS (n=45)
Droxidopa	33.3
Beta-blockers	35.6
Procortalan	37.8
Midodrin	6.7
Orstanorm	4.4

Displayed as % of POTS subjects. No control subjects reported use of heart rate regulating or vasoactive medications. Data about current medications were missing for three POTS patients.

Table S2. Serum activity against specific G-protein coupled receptors in POTS compared to healthy controls.

	POTS (n = 48)	Controls (n = 25)	p-value
ADRA1	$1.726 \pm 2.157^*$	$0.923 \pm 0.871^*$	0.006
ADRB2	$5.890 \pm 5.641^{***}$	$2.256 \pm 1.615^*$	<0.001
CHRM2	$1.861 \pm 3.940^{***}$	$0.883 \pm 1.135^*$	0.007
OPRL1	$0.955 \pm 0.857^{**}$	0.640 ± 0.992	0.009

Data was analysed with Independent samples t-test. Log-transformation was applied to calculate the p-values. Receptor activity is shown as the ratio between emitted light from cleaved substrate and non-cleaved substrate and calculated as mean value \pm SD of the mean. Missing values: *n=1; **n=2; ***n=3. ADRA1: adrenergic alpha-1; ADRB2: adrenergic beta-2; CHRM2: muscarinic type-2; OPRL1: opioid-receptor-like 1.

Table S3. Correlation between different G-protein coupled receptors in POTS patients (n=48).

		ADRA1	ADRB2	CHRM2	OPRL1
ADRA1	Pearson Correlation	1	0.206	0.938**	0.418**
	p-value		0.181	< 0.001	0.004
	N	47	44	44	45
ADRB2	Pearson Correlation	0.206	1	0.445**	0.530**
	p-value	0.181		0.002	< 0.001
	N	44	45	44	45
CHRM2	Pearson Correlation	0.938**	0.445**	1	0.481**
	p-value	< 0.001	0.002		0.001
	N	44	44	45	45
OPRL1	Pearson Correlation	0.418**	0.530**	0.481**	1
	p-value	0.004	< 0.001	0.001	
	N	45	45	45	46

**. Correlation is significant at the 0.01 level (2-tailed).

Table S4. Correlation between different G-protein coupled receptors in controls (n=25).

		ADRA1	ADRB2	CHRM2	OPRL1
ADRA1	Pearson Correlation	1	0.139	0.490*	0.610**
	p-value		0.549	0.024	0.002
	N	23	21	21	23
ADRB2	Pearson Correlation	0.139	1	-0.368	0.262
	p-value	0.549		0.101	0.228
	N	21	23	21	23
CHRM2	Pearson Correlation	0.490*	-0.368	1	0.082
	p-value	0.024	0.101		0.711
	N	21	21	23	23
OPRL1	Pearson Correlation	0.610**	0.262	0.082	1
	p-value	0.002	0.228	0.711	
	N	23	23	23	25

*. Correlation is significant at the 0.05 level (2-tailed).

**. Correlation is significant at the 0.01 level (2-tailed).

Table S5. Orthostatic symptoms in relation to specific receptor activity in POTS (n=33) patients.

Dependant Variable	Independent Variable	B (per SD)	p-value	Adjusted p-value
OHQ total	ADRA1	0.768	0.009	0.031

OHDAS	OPRL1	0.543	0.159	0.191

Linear regression was performed to calculate the association between severity of symptoms and receptor activity. All analyses were adjusted for age. Adjusted p-value is defined as the p-value adjusted for the increase in heart rate from baseline to 3 minutes and for the decrease in systolic blood pressure from baseline to three minutes during orthostatic tests. B-values are shown as standard deviation from mean value. OHQ, orthostatic hypotension questionnaire; ADRA1, adrenergic receptor alpha 1; ADRB2, adrenergic receptor beta 2; CHRM2, Cholinergic receptor muscarinic 2; OPRL1, opioid receptor like 1; OHSA, Orthostatic Hypotension Symptom Assessment; OHDAS, Orthostatic Hypotension Daily Activity Scale.

Figure S1. Heat map for the elevated cut-off values (above 75th percentile) derived from the control group shown and presented for each GPCR assays.
